8:00am	Registration Desk Opens Coffee and Light Breakfast Available
--------	--

9:00am	Welcome and Meeting Introduction Peter V. Dicpinigaitis, MD (Chairman)
--------	--

Cough: Year in Review

9:10am	Basic Science	Donald Bolser, PhD
9:40am	Clinical	K. Fan Chung, MD, DSc

Pro/Con Debate: Cough Hypersensitivity Syndrome is an Important *Clinical* Concept

10:15am	Introduction	Peter Dicpinigaitis, MD
10:25am	Pro	Alyn Morice, MD, FRCP
10:50am	Con	Lorcan McGarvey MD, MRCP
11:15am	Q&A	All Session Presenters
11:25am	Coffee Break	

Cough and Gastroesophageal Reflux (GERD)

Chair: Giovanni Fontana, MD

12:00pm	Update: Objective assessments of reflux and their association with cough	Jacky Smith, MD, ChB, MRCP
12:25pm	A critical review: The role of pharmacological therapy in GERD-associated cough	Surinder Birring, MD
12:50pm	Lunch Break	

Psychological/Behavioral Aspects of Cough

Chairs: Paul Davenport, MD and Ian Paul, MD MSc

2:00pm	Psychobiology of cough	Omer Van den Bergh, PhD
2:25pm	Habit cough syndrome and its variants	Miles Weinberger, MD

Oral Abstract Presentation Session

Moderators: John Widdicombe MA, DM, Peter Dicpinigaitis, MD
Teresa Pitts, PhD, Giovanni Fontana, MD

3:00pm	Abstracts and Q&A (Details on following page)
6:30pm	Adjourn

Saturday, June 11, 2011

8:00am	Registration Desk Opens Coffee and Pastries Available	
--------	---	--

Cough and Speech Pathology Chairs: Paul Davenport, PhD and Donald Bolser, PhD		
9:00am	Effect of aging on cough and the swallowing reflex	Satoru Ebihara, MD, PhD
9:25am	The role of the speech pathologist in the management of chronic cough	Anne Vertigan, BAppSc
9:50am	Effect of stroke on cough reflex sensitivity and risk of aspiration	W. Robert Addington, DO
10:15am	Discussion: Bringing cough and speech pathology together	Chairs
10:30am	Coffee Break	

Issues in Clinical Cough Chairs: Lorcan McGarvey, MD and Alyn Morice, MD		
11:00am	Cough-variant asthma: Lessons learned from deep inspirations	Diane Loughheed, MD, MSc
11:25am	Cough reflex sensitivity after lung transplantation	Alex Duarte, MD
11:50am	Therapeutic options for acute cough in children	Ian Paul, MD, MSc
12:15pm	Lunch Break	

Update: Pharmacology of Cough and Potential New Antitussives Chairs: K. Fan Chung, MD and Brad Udem, MD		
1:45pm	Strategies for development of new antitussive drugs	Brendan Canning, PhD
2:10pm	TRP channel antagonists as potential antitussives	Maria Belvisi, PhD
2:35pm	Novel antitussives in development	Clive Page, PhD
3:00pm	Searching for antitussives among herbal extracts – any hope?	Peter Hylands, MD
3:25pm	Conclusion	Peter Diczpinigaitis, MD
3:40pm	Adjourn	

Oral Abstract Presentation Session Overview

Part I: Clinical	
Moderators: John Widdicombe MA DM, Peter Dicipinigaitis MD, & Giovanni Fontana MD	
3:00pm	10 minute presentations followed by short Q&A. Presenting Author listed below.
Cough response to bronchoconstriction is heightened in cough variant asthma	Noriyuki Ohkura, MD
An open-label pilot study of V3381, a novel N-Methyl-D-Aspartate Receptor (NMDA-R) antagonist in chronic cough	Emma Young, MD
Persistent gaseous airway reflux: Cause for failure of fundoplication in reflux associated chronic cough?	Shoaib Faruqi, MD
Cough in Children: An observational study	Francesco de Blasio, MD
Capsaicin and Cinnamaldehyde induced cough reflex between never smokers and current smokers	Masashi Kanezaki, PT
Gabapentin for idiopathic chronic cough: A randomised controlled trial	Nicole Ryan, PhD
Paroxysmal atrioventricular nodal reentry tachycardia as a cause of paroxysmal cough episodes in patients with chronic cough – Interdisciplinary approach to a challenging case	Elzbieta Grabczak, MD
4:25pm	Refreshment Break

Part II: Speech Pathology	
4:45pm	10 minute presentations followed by short Q&A. Presenting Author listed below.
Volitional modification of cough induced by supra-threshold concentrations of capsaicin	Karen Wheeler Hegland, PhD
Impact of systemic hydration and report of fluid intake on coughing, throat clearing, and laryngeal sensation in persons with and without voice disorders	Heather Shaw Bonilha, PhD

Part III: Basic Science	
5:10pm	10 minute presentations followed by short Q&A. Presenting Author listed below.
Glial cell derived neurotrophic factor (GDNF)-induced phenotypic changes in vagal cough neurons	Tina Marie Lieu, PhD
Changes in cough sensitivities to tussive agents induced by intra-oesophageal HCL instillation in mice and guinea pigs	Junzo Kamei, PhD
Antitussive effect of (-) menthol: The role of nasal trigeminal TRPM8 receptors	Jana Plevkova MD, PhD
Airway remodeling associated with cough hypersensitivity as a consequence of persistent cough: An experimental study	Akio Niimi, MD, PhD
A novel model of human neural function in cough	Fionnuala Lundy, PhD
Elicitability of defensive reflexes within the breathing cycle	Silvia Varechova, PhD
6:30pm	Adjourn
